

1-27-2010

Dear Mayor and all council personal, This is in regards to the Hansen gravel pit, as you know road construction has come to a grinding halt. In 2009 the total sale of gravel out of the pit was far less than the letter of credit required by the city. The permit is in the fifth year of its expiration, I am asking the city to drop the requirement of a letter of credit as other pits do not have this requirement , which makes it that much more difficult to compete with them. The condition of 230th was not built to any engineered specs and has been in frail condition since before the gravel pit was started in 2001. I am also asking for a twenty year extension of the permit . In the past four years I have sold the city of Rockville gravel at a huge savings to the city . I do plan on continuing this discount policy because of my loyalty to the city of Rockville . The pit itself does not look offensive and is near the center of the city . I respectfully request an opportunity to discuss these issues before the council at the councils convenience. Thank you DAN HANSEN

Dan Hansen
