

GET TO KNOW THE MAP TO YOUR TAP

Understanding water's path to your home makes it easier to see how to help keep it clean along the way. Whether it's filtered by a city-managed treatment system or nature's own system of soil, sand and rock, there are plenty of simple ways to protect the water. From water-friendly landscaping that reduces runoff, to conservation habits that reduce the strain on our shared water resources, everyone can make a difference. So get to know the map to your tap, and help the water get home safely.

**MAKE THE
WATER
CONNECTION**

Clean water. It starts with you.
