
WHEN IT RAINS, IT STORES

Fill 'er up for free! You and your yard will feel great when you store every downpour in your very own rain barrel. It's the perfect plan to keep your gardens green and reduce runoff, save on your water bill, and dodge a drought. You can also practice water-friendly landscaping by diverting downspouts away from storm drains, and building rain gardens that protect lakes and rivers from untreated storm water. So save up and green up — roll out the barrel and put the rain to work.

MAKE THE WATER CONNECTION

Clean water. It starts with you.
