

# BOOST YOUR H<sub>2</sub>O MPG\*

*\*water usage Matters Per Gallon*

Making every gallon of water go further is easy when you tame the most common water-wasters. Check for leaks in water-using appliances and outside irrigation systems and fix them right away. Upgrade old gallon-guzzling toilets and shower heads to newer low-flow fixtures. And sweep your sidewalk or driveway instead of hosing it down. You'll save water, lower your water or electric bill, and reduce the stress on your septic or city sewer system. Isn't that just ducky?
