

MEMORANDUM

TO: Mayor and Council

FROM: David Blommel, PE
City Engineer

DATE: February 15, 2013

RE: Council Update Memo
SEH No. ROCKV COMMON 14.00

Soil Boring Report from Independent Testing Technologies

We have received the soil boring report from ITT regarding Burg Street. In general the report did not provide any surprises. The recommended street section in the report is the same section we have used on past road projects in the City.

In addition, the preliminary estimates from last fall anticipated this street section and are still valid.

Burg Street Project – Next Step

The next step in the process will be to order a feasibility study in accordance with the Chapter 429 Process. This study is the first step in any assessment project.

I propose to do the work on an hourly basis with the cost not to exceed \$700. The report will be completed in time for your review and acceptance at the March meeting.

I apologize that I will be unable to attend the meeting on Wednesday due to an unavoidable conflict. I will be happy to answer any questions or concerns that you may have. You can reach me at by email dblommel@sehinc.com, or 320.229.4349.
