4:30 p.m.

October 25, 2017 @ ~~4:00~~ p.m. Rockville Council Workshop Agenda Items

- Water leak on Chestnut Street; what went right what went wrong! Have master water plans for core city (Ed Karls drawing and SEH current drawing) available to peruse gate valve locations and service connections
- Culvert on Chapel Street; what went right what went wrong! Have colored print-out, prepared by SEH for this project available as a visual aid, and also breakdown of all costs related to this adventure
- Discuss merit of request for proposals (rfp) for which vendor/service providers? Have a list of current service providers, vendors and subcontractors available for circulation
- Discuss merit of patching bituminous at three water service connection remedial work in alley/street between Broadway Street East and RTCB Trail-BNSF rail corridor. To abide with city policy regarding street restoration.
- Discuss re-activation of EDA. Pro's con's
- SCADA; discuss current capabilities and possible economical modules that could be added to enhance our large investment many years ago and only recently deriving the benefits.

One additional item for workshop; Discuss procedure regarding patching potholes. Why, on a particular road, are some potholes fixed and others are not until the next passing.
