

Be Prepared for a Tornado

Tornadoes can destroy buildings, flip cars, and create deadly flying debris.

Survive During

- Immediately go to a safe location
- Take additional cover by covering your head
- Listen to radio weather reports
- Do not try to outrun a tornado
- If you cannot locate a shelter lay down and cover your head

Prepare Now

- Know your area's tornado risk
- Know the signs of a tornado
- Pay attention to weather reports
- Practice going into a safe shelter
- Sign up for RAVE warning system

If you are under a Tornado Warning, find a safe shelter right away!

Be Safe After

- Keep listening to weather updates
- If you are trapped cover your mouth
- Stay clear of fallen power lines
- Do not enter damaged buildings
- Save phone calls for emergencies
- Be careful during cleanup
